AND NOW, SS!

CQP 1994. What an experience! I hope everybody in the Club had as much fun in that one as I did. Though the weather was a little rugged for us mountain-top expeditioners, this had to be one of the best CQP events ever. Did you notice how much activity we had? The ARRL's HPM event whetted people's appetites for contesting-style activity, and they came out in force for CQP. And who says the bands are dead? 15 was

absolutely screaming, and even 10 meters opened up just for us on Sunday. Sunspot level not withstanding, several county records were blown away this year. CQP just keeps getting bigger and better each time. But now it's all up to the contest judge for CQP '94. Even if you just made a few casual contacts during the contest, please get your log in to K6PU by November 15. Ken needs all the data he can get in order to cross-check logs.

Now that CQP '94 is history, we turn our attention to the big one for NCCC: November Sweepstakes. This is a different sort of thing from CQP. In CQP, we each had two goals: to help the Club put on a good contest for the rest of the US and Canada; and to earn as good an individual score for ourselves as we could. In SS, we have a team focus, which is altogether different. Our goal is for the CLUB to win the Unlimited Club Competition. For most of us mere mortals, the thought of ever winning a major contest is wishful thinking. But here, in team competition for Sweepstakes, we really can be winners. All of us—as a team. If you were part of our winning team last year, you know

(President can't page 2)

Next Meeting

Sweepstakes Kick Off

Friday, October 21
Hewlett-Packard,
5301 Stevens Creek Blvd. Santa Clara
Building 50, Cafeteria
Gather at 6:30 for pizza,
Meeting at 7:30

Program: Trey Garlough, WN4KKN,
by popular demand

It's the third Friday of the month as usual. We'll be back at a familiar and easy-to-reach location in the South Bay. There'll be Pizza and soft drinks.

Program features one of our very best contestors who'll tell us all (yeah, folks, that's ALL) of his winning strategies for Sweepstakes. Trey has more major contest wins to his credit than most of us can count. And he's going to tell us exactly how to do it.

Don't let any of the jokes last year about nicknaming Trey "Dos" (i.e., #2) fool you; This is our big Sweepstakes kick-off meeting, so be sure you're there with your learning curve at the max. They'll be opportunity for questions and input from the audience.

BE THERE--DO IT

Lessons Learned from CQP

CQP gave me a chance to try out one of the wire beam designs presented by W6QHS at the July NCCC meeting. I put up the 2 element 40 mtr wire beam Dave described in his handout. It was up only 45', and about 50 yards away I had a monoband vertical as a reference point. Every single comparison I got said the wire beam was at least 2 S-units higher than the vertical. The difference I heard in receiving was just as good. This antenna is a great addition for a little pistol station without a rotatable 40 mtr beam. Try it out for SS!

First Notice--Christmas Is Coming!

Mark December 10 on your calendar for the NCCC Christmas Banquet. More details in upcoming JUG issues.

NORTHERN CALIFORNIA CONTEST CLUB

President: Bruce Sawyer AA6KX

Vice-President/Contest Chr: Bob Wolbert, N6IP

Sec/Treas: Dick Dievendoff, AA6MC

Directors: Al Maenchen, AD6E

Dave Leeson, W6QHS

Steve Thomas, N6ST

Bob Wilson, N6TV

JUG Editor John Troster, W6ISQ

82 Belbrook Way Atherton, Ca., 94027

Publisher, Maggie Troster, KC6NFE

The JUG is the official journal of the NCCC, published monthly. Copies are mailed to members whose dues are up-to-date. Material submitted for publication must be received no later than the last Monday of each month.

(President con't from Page 1)

what a thrill it is to see our name up there in the lights.

Now that our membership is approaching 200, you might not think your own score for Sweepstakes would make much of a difference to the Club. Wrong! Unlike the DX contests, there aren't many multipliers in SS and you can only work each station once in the contest. Result is that the difference between an average score and a winning score in SS is very small—about a factor of 3. (In CQWW or WPX, it's more like a factor of 20.) So in Sweepstakes team competition, we can't count on having a few great ops in the Club and let them carry it for us. We each have to go in there and slug it out for the full 24 hours, both weekends. Winner of the Unlimited Club competition is simply going to be the club that gets the most members to make a serious effort. The Club needs your help.

In the "NCCC Sweepstakes Handbook", N6IP has presented some fascinating trend data in analyzing our SS competition. However, that data is historical and could lead to a false sense of security. The FRC and YCCC newsletters make clear that at least those two clubs have also chosen SS as a focus event. Also, the cq-contest reflector has been full of chatter from the east coast about SS. They're going to really go for it, and if we let ourselves become complacent, they just might unseat us and terminate our SS dynasty.

The CW Sweepstakes happens just two weeks after our October meeting, on November 4-6.

OFFICIAL US ARMY ANTENNEA LAUNCHER, RAISING AA6KX'S BEAM 50'. LOCATION, ALPIN/MONO COUNTY LINE

The phone weekend is two weeks after that, starting the morning after our November NCCC meeting. Those two weekends in November are the place to put all your contesting energies. Sit out CQWW if you have to—it's going to be boring from California, anyway. But make a serious effort in Sweepstakes. And don't forget: "serious" for NCCC is defined as 100,000 points. For all those who do make a serious effort in just one of the two modes, and also turn in a log for the other mode, the Club will reward you with a personalized hat prominently displaying your call sign. Do it both weekends and the hat will advertise to all the world that you did it both modes. You too can be a winner as part of our team.

WOLBERT'S WORDS

NCCC Triple Crown—one down, two to go...

CQP '94 was an outstanding success. Although the solar flux index loitered near its theoretical minimum, seasonal propagation and intensive activity combined to produce many four-digit QSO totals in and out of state. On a promising note, AE6Y reports receiving *one hundred* serial number 1s. Make sure you postmark your logs by 15 November to Ken Anderson, PO Box 853, Pine Grove, CA 95665.

As of a couple of days after CQP, here are the scores received. More next issue.

California QSO Party '94 Scores

VE7NKI	617	51	62,934

Congratulations to our contest winners:

CQWW CW '93 and ARRL DX results are out. NCCC's top ops placed very well, as expected.

Last November's CQWW CW saw the 4M5I team, lead by WM2C, placing #2 for world-wide multi-singles. AG6D's local M/S team achieved a #6 USA finish, a great effort from California.

February's ARRL DX CW saw AG6D's multi-single team again breaking the top ten in the U.S. Al and company took fourth place. But the most exciting accomplishment came from our president, Bruce, AA6KX, who set a new record for low power single ops from his ZF8BS superstation. In fact, Bruce achieved #3 overall, whipping nearly all of his high

power competition. Check out his neat "advertisement" on page 114 of QST. During the phone weekend, the P40V M/S team of AI6V and W6QHS took first place world. And WR6R/KH6 won 7th place world. A round of applause for all!

September Scores:

North American Sprint

NCCC fielded two teams in the CW Sprint, but some miscommunication doomed our effort. See Scott's, N1EE, report elsewhere in this JUG for particulars. The next Sprint will be held in February (probably 12 February). NCCC will win this one! More about this later.

Next: Sweepstakes!

SS CW: 5/7 NOVEMBER SS Ph: 19/21 NOVEMBER
2100Z TO 0300Z

(1:00 P.M. Saturday to 7:00 P.M. Sunday, P.S.T.)

Just a few short weeks before SS begins. Time to make your final preparations. Is SS prominently marked on your calendars? Don't let anyone commit you to anything else these weekends! NCCC's chances of taking SS #10 look really good, but of course it is up to you.

Remember to work all NCCCers. These Qs are the most valuable to the club, giving us double the points of an ordinary QSO while giving our competition zero. Look for NCCCers on 3545 for CW or 3865 (phone) at 0700Z Sunday morning (11 P.M. P.S.T. Saturday night).

Please get your SS summary sheets to me by 15 December and postmark your logs to ARRL by 22 December. Do not forget to clearly state on your summary sheet:

CLUB COMPETITION: YES, NORTHERN CALIFORNIA CONTEST CLUB

Sweepstakes Handbook

A best-seller now in its second printing. If you don't have yours with its valuable insights and tips on how to WIN and WIN BIG, turn to page 9, fill out the order blank, and mail it now, before October 24. They cannot be printed or mailed after that date. Don't deprive yourself of being in the Know. This is no ordinary self-help tract. It is the definitive gathering of winning method and technical wisdom yet compiled in one place. Beginners, OM's, YL's, YF's., yes you too, this book is for all NCCC'rs. Sorry, available only to members. It's free. Charges are for mailing costs only.

Re-Cap of the Doin's

Last Meeting

Reminds ya of Edgar Allen Pro., the one who wrote "Quoth the raven, Livermore"? I think that's it. Anyway we were there, in the Livermore City Council Chambers, some 50 members strong. Great meeting room.

Requirement was that we had to leave it as span and spic as we found it. Last time sighted, prexy Bruce, AA6KX, had his personal vacuum going full volume, tidying up.

Bob, N6TV, reported that all but seven California counties had been filled for CQP to that date. (At press time all counties had been filled. Scores and results elsewhere in JUG.)

Big thanks directed to Al, AD6E and Bob, N6IP, for the excellent publicity they generated for CQP by sending out more than 500 letters across the country. Ken Anderson, K6PU, was also applauded for his continuing work as contest recorder and scribe. We'll reserve six pages in the JUG for his '94 CQP report.

Dick, AA6MC, reported club solvency at \$6100 in the bank. 21 ops had still not renewed. However at press time most of them had and membership is now more than 180 !!

As always the two highlights were the food and the program. W6OAT, Rusty, arrived with a mega order of Give Pizza Chance pizzas, cut into slices that overflowed the plates.

We then launched the program, the demonstration of five different logging systems. Each demonstrating op, brought in and set up his own computer station. N2MM showed and explained the N6TR program, AD6E and AE6Y each demonstrated his own original logging program. N6TV showed the K1EA V.9.02, and N2ALE a system somewhat similar to K1EA's. Each gave the JUG a summary of his program and what it does. And here they are.

Computer Logging

Summary of Demonstrations

N2MM: The TR logging program is a favorite of serious contesters owing to its time efficient operator interface. It handles more than 35 contests and has all the standard features of other programs, including band mapping, packet, multi-multi and radio interface. Support includes a 24 hour BBS and e-mail access to a user round table and the author.

AE6Y: My CQP Software is a full featured logging program in both DOS and Windows. It logs, dupes, displays rates, mults, prepares summary, log and breakdown sheets, etc. Many features are current versions 5.0 for DOS and 3.0 for Windows. I have an alpha copy of Version 4.0 for Windows that I used in CQP that built on support for sending WAV files using soundblaster card. This allows sending CQs etc. with same function key as CW. Also sends exchange. Works FB. Fidelity is excellent. It helped me do so well on phone in CQP (only s/o station) operating both phone and CW, I got more that 1K Qs on phone (1117)

AD6E: CQP software. Does usual functions of dupe checking and logging, also displays score, band-by-band QSO tally, and keeps track of mults (either In or Out of State). Multiple mults allowed. (NM./AZ/CO/UT/VT gave you five mults with one QSO, you get the idea). In CW, all 10 F keys are CW memories. What separates this program from others is format free data entry. Enter call, QTH and number in any order: W6YL, 123, SCLA is logged. This could also be entered as: 123 SCLA W6YL. No problem. An error? Just re-type it. NO EDIT KEYS to fool with. 124 SCLA W7YL W6YL 123 (enter) is logged correctly.

N2ALE: NA is a CT look-alike for the less intense contesters wanting to work minor contests and state QSO Parties as well as the big ones. NA has an excellent manual with detailed

description of all its features. Special features are a contest simulator, and creating user-defined contest logging.

N6TV: CT by K1EA Version 9 has many new features including 50-line VGA mode, mouse control of window position, and a neat "band-mapping" feature for those with computer-controlled rigs. Dial in a frequency, and it tells you who is there! CT is the best one to use for multi-op since all computers can be networked together. CT 9.07 is the latest version available. Some bugs have been reported with the DVP after version 9.02, however, so make sure you get the latest fix.

Write Log for Windows by W5XD This program looks great on the screen, and the data entry in version 7.10 is almost exactly the same as CT. Great for two-radio mode since you can have two data entry windows. Uses the standard CT keying circuit, or you can key CW via a PK-232. Full support of packet and most major contests, with beautiful summary sheets (far superior to CTs). Uses the CT country file and MASTER.DTA file. Can use sound board in your PC for voice keying without any additional software. For only \$29.50 introductory price, it's well worth the investment. By far the "best looking" of all the contest software, and getting better with each release. I used Write Log in CQP. It worked great. Order from W5XD Software, P.O. Box 371, Round Rock, TX 78680-0371.

Yolo To Go

Saturday night, after making exactly 1,000 QSOs from my home QTH in the CQP, I took my trusty TS-930S and IBM laptop, drove to Force 12 Antennas in Santa Clara, loaded up N6BT's big truck full of gear, and off Tom and I went on a County Expedition to rare Yolo County. We had an Alpha 87A on the front seat, Tom's beefy generator in the back, an un-assembled Force 12 C-3 tribander on the roof, and a U.S. Tower tower-trailer in tow. We arrived in tiny Winters, CA around 2:30 a.m. Saturday night (Sunday morning), exhausted. We parked at a quiet spot in front of a church for a few hours' rest.

At dawn, after some strong coffee at the friendly Putah Creek Cafe, we began our search for a CQP site. A hunt in the hills west of Winters was unsuccessful. Either the mountains were in the way, or roadside power lines made it impossible for us to safely raise the tower.

We finally found an overcrossing above I-505 that gave us plenty of height without any nearby power lines. We parked at the side of the road about two-thirds of the way up the overcrossing, on the Eastern side. It took us only an hour to assemble the Force 12 C-3 tribander, install it on the tower, raise the tower about 35 feet tower, and set up all the gear (TS-930S, Alpha 87A, and IBM laptop running CT 9.05).

As soon as I fired up the rig on 20 SSB there was Gary, WA6VEF/VE7NTT, calling "CQ California from VE7SZ," loud as could be. I couldn't wait to call. This was going to be his first Yolo, right? Wrong. "I just worked a guy in Yolo a little while ago, but he only gave me number 20. Niki still needs you guys though!" Sure enough, 10 kHz down the band was Gary's wife Niki, VE7NKL, also calling "CQ California." She was QSO number 2 from N6BT in Yolo County was sure happy to work us.

The C-3 tribander worked great on both 20 and 15 (we didn't have time to check 10). Less than five hours later we

finished the contest with 542 QSOs (including 103 on CW) and 57 multipliers (missed Delaware). Lots of people said we were a new multiplier, so the trip was definitely worth the effort. After all these years of begging people to go places for CQP, I finally went on an expedition myself. What a blast! Many thanks to N6BT for providing transportation, the amplifier, antenna, and tower.

LOGGING PROGRAMS PROVED TO BE REAL CROWD PLEASERS. FIVE DIFFERENT ONES WERE PRESENTED AT THE MEETING. AT TOP, ANDY AE6Y, RINGS THROUGH THE LOGGING PROGRAM HE CREATED FOR APPRECIATIVE AUDIENCE. AL AD6E DISCUSSES THE FINE POINTS OF THE PROGRAM HE CREATED. BOTH OF THESE OPS GAVE OUT FREE IBM COPIES OF THEIR PROGRAMS. EACH OF BROUGHT IN AND SET UP HIS OWN COMPUTER AND EQUIPMENT. IT GENERATED A LOT OF INTEREST, MAKING COMPUTER LOGGING LOOK EASY AND THE ONLY WAY TO GO!

Pet Peeves

Volume XXIII

Almost all NCCers know, from constant drilling by our in-house experts, that we must never repeat QSO information unless it is requested. We often hear others do this, primarily on phone, resulting in longer QSOs and lower rates. More disturbing to me is the use of "QSL" on CW, for even an occasional NCCer will pound out these three *loong* letters acknowledging exchange reception. I know the PED simulator does it, but PLEASE don't you send "QSL!" N6TV and other top ops claim that no specific acknowledgment is necessary when answering a station, as reception is confirmed by the lack of a request for a repeat (except in the Sprint, but that's another story). *If you must send something, please use "R"!*

TROSTEROSTER

TV Winning Technique Revealed

Some kind of award's got to go to Bob, N6TV. Speaking at our Livermore meeting, and only because the SS trophy is so high a goal, he revealed the magic bullet behind those Big Scores he runs up in contests.

In the interests of space and non-space rocket scientists among the readership, I have extrapolated from his thesis, the key word, ok, two words, of his secret technique. You won't believe it unless you were there, but here it is:

HE BEGS!

Did you think it was state of the art equipment, antennas, multi-towers, mike technique, stamina, computers, all of the above? Naw, he wheedles, panhandles, begs. He even disclosed some of the best routines, he uses. He actually wants us to know how to do it. So the JUG tells all.

The fine art of begging as practised by N6TV was not mastered in a day. Rather, he demonstrated, it was honed in lo many a CQP contest. It goes this-a-way. Start on Saturday and do one's very best in conventional ways. Very important. One does not begin this begging stuff until Sunday, and then slowly. If one does not get an answer to one's "CQ contest", early on Sunday, one may add after one's CQ, "Isn't there anyone out there who wants to talk to me?" Voice just a little hurt, no wavering, no emotion. Then if no reply add, "...in the whole wide world?" In proportion to the contest time left, one gradually turns up the emotion. "Please someone, I really need a QSO. I'm in a bad struggle with a QRP station down the street who's running a DOTR antenna who has 137 more Qs than I have". As it gets later and later, one must add appropriate urgency to the pleading and begging.

Little by little wily enticements such as "I'll send you my QSL— free, if you answer," are added. Or, in true

desperation, "I'll dig the hole for your new tower if you'll just give me a call." Down to the last couple of hours, one must launch into a desperate mode: "I'm going into the hospital for major surgery right after the contest. Won't someone please give me a final QSO?"

Jim, WA6SDM, with a quick pick-up on sure-fire bets, suggests we listen to, and record for future reference, the professional mendicants on KQED pledge nights. Somebody revealed K7JA, Chip Margelli's pleas when he was a kid (they start young with this kind of thing) operating at multi-contest station W7RM: "I'm working my way through college. W7RM is paying me a dollar per QSO. I'm a senior and I need the money. Won't someone out there help?"

Thanks, Bob for the mighty inside know-how. The airwaves now may resound with heartwringing appeals from NCCC'rs for two November week-ends, but hey!, if it makes a Milli-yun, we're there. But that's on SSB. How can one squeeze emotion into Morris Code? Guess we'll just have to listen and find out.

TV BOB RUNS HIS PROGRAM FOR GEO AND JOHN

ISQ Bulletin Board

Give Pizza Chance . Anytime! The hugely, and I do mean huge, delish, pizzas delivered in person by W6OAT for our September meeting, were the best. Just proves, hams don't always do it with dots and dash.

Congrats in order for Andy AF6Y, who received his 5 Meg award. This was NCCC's 5 Megger number 40, and was accomplished mostly with a vertical, an interesting fact to consider.

Great to see George, WB6DSV. Seems about a dozen years since he's been at a meeting. But we're not counting. He does come over and help at Field Day at K6ZM's. GL George, with the remote in SS!

Unique program idea, Bruce, Real success. In spite of Prexy's limited speech and eatingability due to dental surgery that day.

De AA6MC

Welcome new members.! AA6YX (Dave), KD6KKP (Jenny), N6TNW (Shirley), N6TNX (Dick), N6ULG (Bill), W6PYX (Jim), W6SUN (George), WA6TKV (Ray), and WB6YRN (Les) joined us at our August meeting in Auburn. N6IFW (Jerry), KE6GSQ (Patricia), W6GPM (Jim), KN6QT (Bob), and N6OJ (Chuck) joined us at the September meeting in Livermore.

Our total membership is now 184. An additional 11 have not renewed for 1994-1995. I have attempted to contact each of the 11 individually in an effort to retain them. Only one has said he does not intend to renew.

Reserve December 10 on your calendar for the NCCC Christmas Banquet, which will again be held at the Stanford Park Hotel. Details will appear in next month's JUG.

We have reached our income goal and our expenses are as planned.

	1994-95 Plan	YTD Actual
Membership dues	\$3780	\$4056
Advertisements	\$ 300	\$ 300
General fund contributions	\$ 100	\$ 403
CQP contributions	\$ 0	\$ 30
Non-member JUG subscriptions	\$ 0	\$ 16.50
Total income	\$4180	\$4805.50
JUG publishing & special mailings	(\$2600)	(\$ 604.77)
NCCC share of CQP expenses	(\$ 500)	(\$ 292.73)
Awards	(\$ 650)	(\$ 61.16)
Visalia Hospitality	(\$ 200)	
Contingency	(\$ 230)	
Self-funding events (Banquets, badges)	(\$ 0)	(\$ 223.51)
Total expenses	(\$4180)	(\$1182.17)

Balance at start of Fiscal Year 94-95	\$2501.02
Activity credited to Fiscal Year 94-95	\$3623.33
Activity credited to Fiscal Year 95-96	\$ 48.00

GENERAL FUND TOTAL: \$6172.35

N2ALE PUTTING HIS LOGGING ACTION FOR AN INTEREST-FREE ONLOOKERS

Send me a copy of the NCCC Sweepstakes Handbook. I am enclosing \$2 for postage expenses. I am an in-region member and my Sweepstakes log(s) will be credited to the Northern California Contest Club.
